

# Battery motor **scorpio**

## **Product description:**

The **scorpio** battery-powered motor offers a flexible and mobile solution for emptying drums, IBC containers and other containers, anywhere where no current flows or is available.

Thanks to its compatibility with the Makita battery system, your drum pump is always ready for use, wherever you are.

## **Time saving:**

Fast and efficient emptying of containers without cumbersome manoeuvring.

## **Cost reduction:**

Use your existing Makita batteries - no additional investment necessary.

## **Flexibility and mobility:**

Ready for use in any situation, whether in the warehouse, in the workshop or in the field.

## **Environmental friendliness:**

Reduce your energy consumption by using a highly efficient, brushless motor.

## **Comfort and efficiency:**

Easy handling and high pumping capacity for comfortable and efficient work.

## **Durability and reliability:**

Robust construction and high-quality materials for a long service life.

## **Versatility:**

Can be combined with our proven grün pumping stations. Whether PP, PVDF, aluminium or stainless steel - your application decides!

## TECHNICAL DATA

Delivery rate	max. 60 l/min
Funding level	max. 10 m
Viscosity	max. 100 mPas
Drive technology	brushless, brushless DC motor
Nominal voltage	20 V rechargeable batteries, Makita compatible
Rated speed	9500 rpm
Speed control	stepless
Quick-change function	Bayonet
Sound pressure level LpA (according to EN60745)	75 dB (A)
Mileage	up to 2000 litres per charge (depending on battery an medium)
Weight	1.6 kg (without battery)
